

Industrial Process Piping Database

The Industrial Process Piping Database gives you the information you need to begin estimating productively right away.

Thousands of standard industry items—from copper, stainless steel and ductile iron piping to connections, supports and anchors—are included to get you started. Just add your own pricing and you're ready to go.

You can also customize the database to fit your unique needs. Estimating, a Sage Timberline Office application makes it easy to add your own items, formulas, assemblies, productivity and conversion factors to the database as you estimate.

The database also includes Smart Assemblies™ that let you take off even the most complicated building component, like stainless steel piping, in one step. For example, when taking off a run of stainless steel pipe, simply enter one set of dimensions and the assembly will generate labor and material costs for the pipe, insulation, tees, caps, couplings, lab joints and more.

General Database Specifications

- More than 19,600 Items
- More than 500 Formulas
- 83 Smart Assemblies
- 94 Bill of Materials Classes

Number of Assemblies

Division	Number of Assemblies
	4
General Conditions	6
Demolition & Sitework	4
Pipe - Cast Iron (Duriron)	3
Pipe - Copper	7
Pipe - Plastic	15
Pipe - Stainless Steel	10
Pipe - Carbon Steel	11
Pipe - Specialties	14
Sample Applications	

Industrial Process Piping Database is a part of Sage Timberline Office, fully integrated software created to streamline work and connect the people you depend on to build your business.
