

Industrial Process & Plant Database

The Industrial Process & Plant Database gives you the information you need to begin estimating productively right away.

Thousands of standard industry items—from site piping to pumps and compressors—are included to get you started. Just add your own pricing and you're ready to go.

You can also customize the database to fit your unique needs. Estimating, a Sage Timberline Office application makes it easy to add your own items, formulas, productivity and conversion factors to the database as you estimate.

The database also includes Smart Assemblies™ that let you take off even the most complicated building component, like turbine pumps, in one step. For example, when taking off a turbine pump with concrete pads, simply enter one set of dimensions and the assembly will generate labor and material costs for the pumps, pads, liquid curing compounds, finish, rebar, grout and more.

General Database Specifications

- More than 21,600 Items
- More than 1,700 Formulas
- 283 Smart Assemblies
- 345 Bill of Material Classes

| Division | Number of Assemblies |
|---------------------------------|----------------------|
| General Conditions | 4 |
| Demolition & Sitework | 12 |
| Pavements & Surfaces | 10 |
| Site Piping | 31 |
| Site Improvements | 5 |
| Concrete | 34 |
| Masonry | 18 |
| Metals | 22 |
| Carpentry | 27 |
| Thermal & Moisture | 13 |
| Doors & Windows | 8 |
| Finishes | 43 |
| Equipment - Pumps & Compressors | 17 |
| Pipe & Mechanical | 2 |
| Copper Tube | 3 |
| Pipe Plastic | 17 |
